

propelair®

The commercial toilet of choice

In 2019, Propelair customers will:

Save 1.2 billion litres of water

Equivalent to **42%** of all of the bottled water sold in the UK

Reduce 1 million kg of CO₂

The equivalent of taking **225** cars off the road for a year

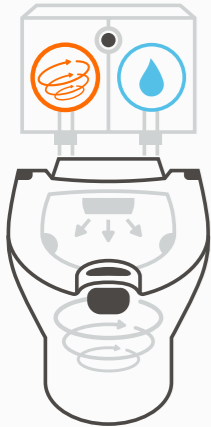

Deliver £4 million worth of savings

Firms with material sustainability policies outperform by **80%**

British inventors and manufacturers

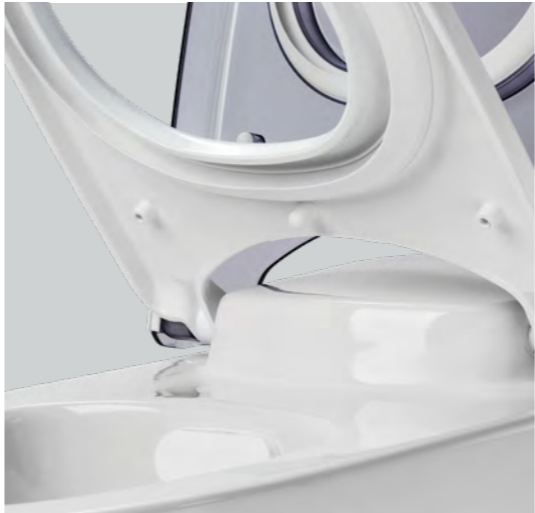

of the lowest water flush toilet in the world

Using air to propel water around the toilet bowl means that just 1.5 litres of water cleans & removes all waste into existing drains.

Delivering 'world first' innovation with best in class service;

- Project funding options
- Customer service
- Technical support
- Fully certified installation professionals
- After care
- Preventative maintenance programs

Flush volume can dramatically affect

water consumption in your commercial premises

Average 'at work' water consumption per employee:

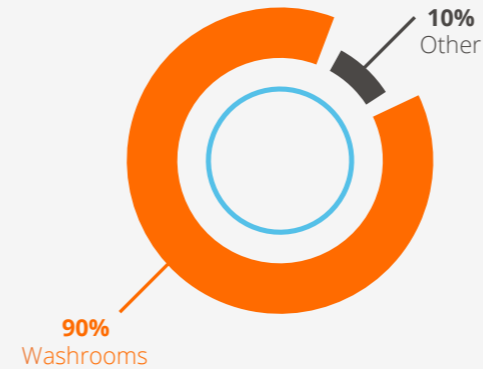

50 litres of water per day

13,000 litres of water per year

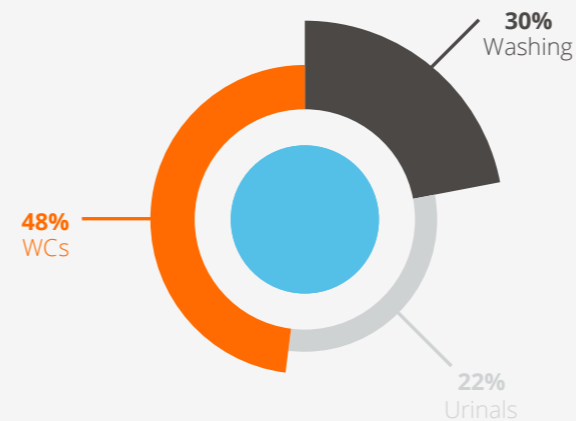

6,240 litres of drinkable water is flushed every year per employee

**Arup performance review 2016*

Washrooms typically use 90%

48% goes down the pan!

Commercial washrooms suffer from:

- High water use
- Poor hygiene
- Breakages
- Slow refill leading to queueing
- Depleted water reservoir
- Low pressure

All of which lead to increased costs, a drop in productivity and user dissatisfaction.

Business benefits:

Save water, Cut carbon, Reduce maintenance, Save money

- 1.5 litre flush
- Up to 84% less water

- Up to 80% carbon reduction
